

# Canvas tool guide for teachers

From the CreATE team at the Faculty of Education and Social Work, the University of Auckland - October 2015.  
Based on the Moodle tool guide for teachers by Joyce Seitzinger (@catspyjamasnz / www.cats-pyjamas.net)

Teaching goal →	<b>Ease of use</b> How easy is it to set up and use this tool?	<b>Information transfer</b> Is it a tool for disseminating information to your students?	<b>Assessing learning</b> Will this tool allow you to assess your students' learning?	<b>Communication &amp; interaction</b> Can students communicate with each other and the teacher with this tool?	<b>Co-creating content</b> Can you and your students collaborate and create content together?
↓ Canvas tool					
<b>Pages</b>	Easy to create, edit, and embed content, including links and media files	Yes, this is the primary purpose of pages	Pages are not used for assessment unless you enable student editing (see next row)	Pages present information passively, unless you enable student editing (see next row)	Pages can only be used this way if you enable student editing (see next row)
<b>Pages (student editable)</b>	You need to identify a clear purpose and communicate with your students in order to use this effectively	You can 'seed' pages with content but students may edit or change it	You can assess student activity but it does not connect directly with the gradebook	Students can interact by editing each others' work	Yes, students and teachers can design, edit, and embed content individually or together
<b>Announcements</b>	Very simple to set up, and students will get automatic email reminders	Announcements are valuable for info transfer unless you dilute their impact through overuse	Announcements should not be used for assessment - use discussions instead	You can enable student replies to announcements, but interaction may be better as a discussion	Announcements shouldn't be used for the co-creation of content
<b>Discussions</b>	Very easy to set up and use	Can be valuable, but information overload is a risk; important details may be lost in the chatter	Marked discussions are possible, but you should put thought into the pedagogical design	Discussions are an easy way to encourage students to interact with you and each other	Discussions can be used to negotiate, research, and discuss, but not really for the content creation itself
<b>Files</b>	Easy to upload and organise PowerPoints, PDFs, images, and other documents	Yes, this is the primary purpose of files	Students do not upload files except through assignments (see below)	Files are used for the distribution of content, not for interaction or communication	Students can share files with each other but only if they are placed in groups
<b>Assignments</b>	Assignment set-up can be easy or complex depending on what options you choose	Assignments shouldn't be used for information transfer (except for the instructions!)	This is the primary purpose of assignments	Students and teachers can communicate through feedback and (optionally) peer review or group work	Can be used for co-creation of content if you make it a group assignment
<b>Quizzes</b>	Effective quizzes require prior thought and some careful set-up	No, quizzes are an assessment tool	Yes, excellent for immediate feedback and student reflection; can be formative or summative	Graded quizzes are not communication tools but an ungraded survey may be used to get feedback	Quizzes are not typically used for the co-creation of content
<b>Collaborations</b>	Students must connect their Canvas and Google accounts first; currently limited to Google Docs only	Teachers have the option to 'seed' content to guide students, but this is not its primary function	Yes, students can share and submit their collaborations as assessed work	Teachers and students can communicate and interact through collaboration comments and content	Probably the best tool in Canvas to encourage co-creation of content
<b>Conferences</b>	Requires thought around timing, structure, and flow	Requires set-up but can be used to disseminate information by running live lectures online	You could technically do this, but it does not connect with the gradebook	Excellent opportunities to communicate with video, audio, and text chat	Saved archives only last 2 weeks so content should be housed elsewhere (e.g. a collaboration)
<b>ePortfolios</b>	ePortfolios work differently from other tools so it is important to ensure student familiarity	ePortfolios are generated by the student so they are not used by the teacher in this way	Yes, a strong way of assessing student development and reflection	You can allow for comments on ePortfolio pages but this is not their primary purpose	ePortfolios do not allow for other students to co-author content

Key: Great fit! Can work with some learning design Not the best tool
